[COMMUNITY ORGANIZATION AND CORPORATE PARTNERSHIP INFO HERE](#)

The Forest Park Ministers Association cordially invites you and your congregation members to participate in the ***Ministers for Healthy Communities Project***.

The Project:

The Forest Park Ministers Association (FPMA) has endeavored to work as a connector and a catalyst regarding quality-of-life improvements for individuals, families, churches and communities in Clayton and Fulton Counties through our new Ministers for Healthy Communities Project (MHCP).

The Challenge

“Inequalities in health status in the U.S. are large, persistent, and increasing. Research documents that poverty, income inequality, poor quality of life, racism, sex discrimination, and low socioeconomic conditions are the major risk factors for health inequalities. These systematic, avoidable disadvantages are interconnected, cumulative and intergenerational. Great social costs arise from these inequities.” ~ *Centers for Disease Control Community Resource Guide*

Solutions

Clergy and Faith-Based Organizations, by virtue of their role, have the potential to provide highly effective change within their communities due to their influence, resources, skills, and credibility. The Ministers for Healthy Communities Program (MHCP) is designed to utilize these assets to close the gap between academic medicine, corporate medicine, health centers, behavioral health programs and communities with the greatest need by connecting the two in a culturally competent fashion.

The Mission

Our collective mission is to empower at least one hundred (100) churches located within Clayton and Fulton county with training, funding, resources, partnerships and support to effectively engage their church members and the communities in which they are located.

Therefore, the FPMA respectfully requests a brief meeting with you as soon as possible to provide more information and to discuss opportunities for participation and inclusion of your faith-based organization MHCP.
